Доверьте заботу о Вашем слухе профессионалам

Центр Слухопротезирования в г. Ростове на Дону существует уже более 10 лет. Мы предлагаем полный спектр услуг, от начального определения проблемы снижения слуха до точной диагностики и подбора слухового аппарата, гарантийного, постгарантийного и сервисного обслуживания.

Новые поколения слуховых аппаратов, которые предлагает наша компания, позволяют корректировать практически любой вид тугоухости. Широкий модельный ряд - от заушных до самых маленьких внутриканальных - слуховых аппаратов позволяет успешно использовать эти слуховые аппараты, как во взрослом, так и в детском возрасте. Благодаря современным микропроцессорам и новым стратегиям обработки сигнала достигается великолепное качество звучания и оптимальная разборчивость речи в любой шумовой обстановке.

Успех слухопротезирования в нашем центре обеспечивается высоким профессионализмом наших специалистов, прошедших стажировку в ведущих центрах слухопротезирования Австрии, Германии, Швейцарии, большим выбором качественных слуховых аппаратов, использованием современного оборудования и материалов, а также чутким подходом к каждому пациенту.

Next™ 8 Moda II™

312 BTE

AutoPro2™

8 Channels, 8 Bands, Adaptive Directionality

HEARING INSTRUMENT FEATURES

- AutoPro2™ intelligently analyzes the input signal and quickly adapts to 1 of 2 distinct destinations. Within each destination, the adaptive features can be customized for optimal listening and comfort
- Highly advanced feedback management that delivers more usable gain, allowing clients to enjoy the natural comforts and advantages of an open fit
- AntiShock™ instantaneously reduces the level of impulse noises such as a door slam, while maintaining the quality and intelligibility of speech
- Speech enhancement LD emphasizes speech signals based on the input level
- 8 channels provide high resolution signal processing
- Adaptive directional microphone system tracks and suppresses moving noise sources, while focusing on sounds from the front
- Noise Reduction, Wind Noise Manager
- Data logging accurately records data on time spent in each program and listening destination. Volume control changes are also logged in manual and automatic programs.
- MyMusic™ enhances the music listening experience by bringing out the rich, full tones of music
- OnBoard™ control is easily configured as a volume control or program button
- Up to 3 additional manual programs provide customization for individual needs and preferences
- Ideal volume indicator provides a beep notification when preferred gain is reached on the volume control
- Low battery warning
- Start up delay
- On/Off by opening or closing the battery door
- Can be programmed using NOAH-compatible U:fit™ and Standalone U:fit fitting software v1.4 or higher
- Choice of processing strategies, WDRC or Linear
- Battery Size: 312

OPTIONS & ACCESSORIES

- Remote control with volume control, program change button, and more
- Telecoil (T) or Microphone/Telecoil (MT) option can be set as one of the 3 manual programs
- Choice of domes and tubes
- Earhook

118/45
Next 8 Moda II

Next 8 Moda II is suitable for fitting mild to moderately severe hearing losses and can fit audiogram configurations ranging from reverse to precipitously sloping.

Test Conditions:

Battery: 312

Source: Voltage 1.3 V

The measurements obtained with a closed configuration with a straight measurement micro tube (004-1393) using a HA-1 coupler (ANSI-3-7-1995) or occluded ear simulator (EN 60711, coupling arrangement according to fig. 4 in the test standard). The hearing instrument set to linear, omni mode with all adaptive features disabled.

Domes should never be fitted on patients with perforated eardrums, exposed middle ear cavities, or surgically altered ear canals. In the case of such a condition, we recommend to use a customized ear mold. We reserve the right to change specification data without notice as improvements are introduced.
